

# What Are Different Parts Of The Roof Called?

**RIDGE:** The highest point.

**FLASHING:** The pieces of metal used to prevent water seepage around intersections.

**UNDERLAYMENT:** The heavy felt paper placed under the material for extra protection from moisture.

**SHEATHING:** The panels that cover the rafters. Materials (such as shingles) are attached to the sheathing (also called decking).

**RAFTERS:** The beams that run from the top to the bottom.

**ROOF TRUSS:** The framework.

**FASCIA:** The trim used to cover rafter ends.

**DOWNSPOUT:** The pipe that carries rainwater to the ground.

**SOFFIT:** The finished underside on eaves.
